

REPROMO Idea

The ALTENER Campaign REPROMO accelerates RES market penetration in Central and Eastern Europe by forging alliances of manufacturers, financial institutes and project developers. These new project consortia will further develop hand-selected project ideas for renewable energy actions in Czech Republic, Estonia, Hungary and Poland.

REPROMO Actions

In the last 18 months concrete project ideas were discussed on four regional REPROMO Seminars. Project developers presented their ideas and discussed with international experts about their technical and financial feasibility. Particular attention was paid to the existing legislative and

financial framework conditions in the target countries. All four events were highly successful.

The REPROMO MARKET PLACE takes place on the WORLD BIOMASS CONFERENCE on THURSDAY the 13th of May at 13:30 in Room 5

REPROMO Market Place

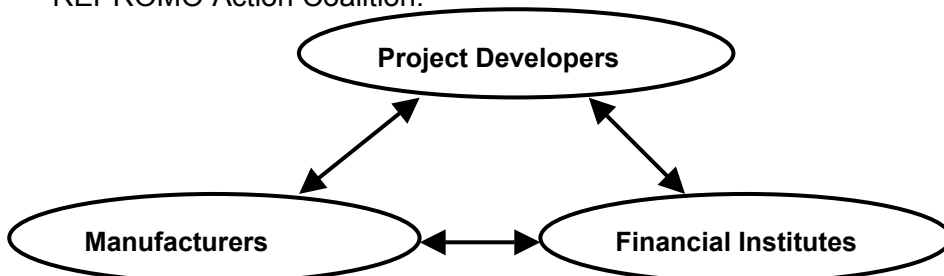

All main results of the intense REPROMO work are compiled in the REPROMO Market Place.

The oral and visual presentations on the Market Place will highlight highly interesting action ideas in Central and Eastern Europe in the field of:

- Landfill refurbishment for biogas generation
- Production of biofuels particularly pellets
- Erection of new biomass power plants
- Boiler Conversion in district heating networks

The REPROMO Market Place will give the opportunity to meet the involved project developers and discuss the possibilities for direct co-operation.

REPROMO Action Coalition:

REPROMO is supported by the EC ALTENER Programme

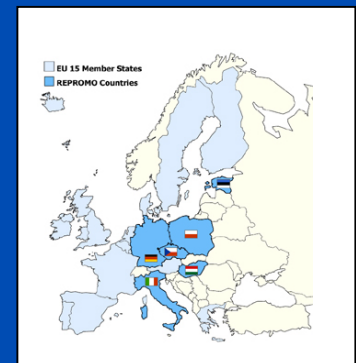

ALTENER Campaign

REPROMO

REPROMO Partners

ENVIROS, Czech Republic
Estonian Biomass Association
ETA – Renewable Energies
European Biomass Industry Association
European PV Industry Association
GEONARDO, Hungary
KAPE, Poland
WIP – Munich
